

## Video Analysis Training G-Tect

“Video analysis, your step to the winning image”

### Description:

With our video content analysis systems, you filter relevant information from large data sets. Analysis algorithms constantly monitor any scene and alert you in critical situations. In video analysis training, you will learn different methods for video analysis and configure different functions for different scenarios.

### This training is intended for:

GEUTEBRÜCK Installer, partner and all employees who are responsible for parameterizing the GEUTEBRÜCK video analysis systems.

### Recommended requirements:

Prior participation in the G-Core Training. Basic knowledge in network technology and video compression. Safe handling of Microsoft operating systems.

### Training Content:

- Presentation of function range of different analytical methods
- Parameterization within the analytical methods
- Sync Loss detection
- Contrast detection
- G-Tect video analysis technology made by GEUTEBRUECK
  - Activity detection for indoor applications
  - G-TECT/VMX & VMD for outdoor applications
  - Motion Privacy, Privacy zones configuration
  - Licence plate detection ANPR/LPR
