

GEUTEBRÜCK Certification

Based on the well-known "Starter Engineer" term, we have expanded our certification series for a differentiated and qualified documentation of your performance. In 2018, we will start with the new concept and expand it steadily and provide it with benefits for the respective certification levels.

In addition to the continuous development process of our training methods and systems, we are expanding our training portfolio and adapting it for a new learning management system. That's why we reserve the right to supplement and adapt content in the certification levels.

	Certificate of attendance	Starter Engineer	VCA Engineer	Advanced Engineer	Enterprise Engineer
User & Operator Training	x				
G-Core Training	x	x		x	x
G-SIM Training	x	x		x	x
G-SIM expert Training	x			x	x
Configuration analysis & G-Health Training	x			x	x
Video Content Analysis Training	x		x		x
Project experience & competence development on the job		(At least 1 year experience with GEUTEBRÜCK products from the time of "Starter Engineer" certification required)			x

Experience:

Practical project work, together with your personal experience, are the main criteria of your individual competence development - *In the classroom you get knowledge, on the job you develop your abilities*. That's why your experience is a criterion for our highest certification level.

Certification example:

You will receive the **Starter Engineer** certificate after successful participation in the **G-Core** and **G-SIM** training. For training modules that do not lead to a certification level, you will receive a high-quality certificate of attendance.
